

Pou Yen Enterprise Co., Ltd.

Bentwood chairs for offices, dining rooms, living rooms, and other applications, including items with casters and armrests, stacking chairs, and floor chairs

Established in 1987, Pou Yen Enterprise Co., Ltd. specializes in designing and manufacturing bentwood chairs for offices, dining rooms, living rooms, and other applications, including stacking chairs and floor chairs. The company also produces to order, offering such products as row chairs for airports and many more.

The company has two factories in China (one in Dalian, Liaoning Province, and the other in Lianyungang, Jiangsu Province) that handle the full range of production including materials sourcing, processing, veneer lamination, and high-pressure shaping. Other plants in Taiwan carry out R&D, leg and cushion fabrication, finishing (spray painting, etc.), assembly, packaging, and quality inspection, assuring top-quality products with on-time delivery.

Made of birch, basswood, and poplar plywood, Pou Yen's stylish bentwood chairs are available in a diverse range of designs for various applications and settings. The

chairs come in clear lacquer finish, with an optional choice of chrome-plated ferrous tube legs, and some with armrests. The company's floor chairs, which are especially popular in Japan, are available with swivels and cushions made of 100% acrylic and polyester. These can also be made to order.

Pou Yen exports 35% of its output to Japan, and also supplies bentwood panels to local chair manufacturers. The firm's annual revenues amount to some US\$2,675,000. Its own R&D team constantly introduces new and trendy products, and the company also welcomes OEM orders.
