

Bestai Enterprise Co., Ltd

Custom-made precision fasteners for industrial, engineering, automotive and medical applications

Founded in 1989, Bestai Enterprise Co., Ltd. has over 20 years of experience in customization and export of all sorts of fasteners, having developed thousands of precision parts and accessories for global customers, mostly in Europe, USA and Japan.

Offering top-quality, made-in-Taiwan products at reasonable prices, Bestai has built stable, long-term partnerships with world-renowned European and American brands, supplying primarily precision lathed, forged, stamped, injection-molded plastic, and powder metallurgical items, all of which are efficiently fabricated according to ISO-certified processes under stringent quality control.

Bestai's comprehensive line of fasteners, including nuts, rivets, and diversified high-precision parts, are designed for industrial, engineering, automotive, and medical applications.

The company has a monthly production capacity of some 5 million CNC-lathed items (maximum 1m length and 36mm dia.) as well as forged parts (3~25.4mm dia. and length to 152mm) in steel, stainless steel, brass, aluminum, etc. that are electroplated with zinc, nickel, chrome, and gold, blackened, and polished.

The company also provides customers with documents such as product test reports, certificates of origin, PPAP etc. to assure quality of products, as well as customer-oriented assembly, packaging, delivery, and after-sales services. To further expand global markets, Bestai steadily launches innovative products while filling OEM and ODM orders. Buyers are welcome to contact the firm with samples or shop drawings for precision machined, perfectly finished hardware products.
