

Tai Yang Zen Ind. Co., Ltd

Automobile, powered-two-wheeler, bicycle, and air tool parts and accessories

Founded in 1990, Tai Yang Zen Ind. Co., Ltd. specializes in the automated production of metallic parts and accessories for automobile, powered-two-wheeler, bicycle, and air tool applications using stainless steel, aluminum alloy, titanium alloy, alloy steel, and pig iron. The company welcomes OEM and ODM orders.

As a crucial global source for the supply of such products, Tai Yang Zen has built sound, long-term partnerships with metal-forming and post-treatment plants in Taiwan for cold and hot forging, aluminum forging, aluminum extruding and casting, with heat treatment, electroplating, anodizing, and film-coating with assured output quality.

The company achieved ISO 9001 certification in 2001 and practices production process control and standardization strictly in accordance with ISO standards. It also uses enterprise resource planning (ERP) to improve its operations.

Backed by the latest production equipment including CNC lathes, CNC milling machines, center-less grinders, and automatic robotic arms, along with inspection equipment such as surface roughness testers, 2D and 3D gauges, and electronic bore gauges, the manufacturer carries out stringently controlled material inspection, production, in-line QC, in-house secondary processing, output inspection, and packaging.

Tai Yang Zen has a team of seasoned, conscientious technicians that provide fast R&D, volume production, and production process standardization services that fully meet the demand, while helping to create mutually profitable business opportunities. Contact the company any time for quality cylinders, CVT and brake parts, and other metallic parts and accessories.
