molds, plates and other irregularly shaped workpieces. To allow customers more choices, Ascender has also worked out BTA and AMB series trepan drilling machines, specifically suitable for machining large center bores from 1 to 3 meters in diameter. Notable is that the company's BTA series have been adopted by

Established in 2012 in Taiwan's central city of Taichung, Ascender Machinery Inc. is an emerging maker of CNC deep-hole drilling machines aiming to offer quality products to build global competitiveness.

Ascender has been dedicated to developing and improving gun drilling and trepan drilling machines ever since its establishment, with such efforts having borne fruit to offer its GC and TG series machines.

The company's GC series gun drilling machines, including single-spindle, multi-spindle and customized models, feature impressive efficiency in central hole machining and are ideal for processing rods and bars. The TG series trepan drilling machines, built with high precision components and optional three-axes displacement non-central machining units, are perfect for eccentric hole machining on

a European partner for sale in Europe, mostly thanks to exceptional quality, performance and precision. Despite only two years old, this company, backed by strong engineering technology and well-honed production skills, has earned good reputation among buyers at home and abroad, and has exported to Singapore, Thailand, China, Canada and Europe. In addition to its Ascender brand, the company also accepts OEM (original equipment manufacturing) orders.
