

# Marutomo Industry Co., Ltd.

Engine parts, brake parts, body parts, shock absorbers, suspension parts, filters, etc.

Founded in 1981 in Iquique, a port city in northern Chile, Marutomo Industry Co., Ltd. has grown into a veteran trading company that began life primarily as a vendor of used Japanese cars and spare parts in Latin American countries such as Paraguay, Bolivia, Argentina, Peru, Ecuador, and Chile.

After gaining a solid foothold in the regional market, at the request of its customers Marutomo transformed itself into a specialized trader of automotive components in 1995 by tying up with a group of quality Taiwanese auto-parts suppliers for the joint development of the South American market. Since then, the firm's market has further expanded into other major countries such as Brazil and Uruguay.

Along with its rapid business advancement, Marutomo has also expanded its product line and currently supplies a very wide range of engine parts (pistons, piston rings, connecting rods, gaskets, liner kits, etc.), brake parts, body parts, shock absorbers, suspension parts, filters, clutch discs, auto lamps, and timing belts, among many others.

The firm supplies aftermarket (AM) spare parts for Japanese, Korean, European, and American passenger cars, trucks and buses, pickups, vans, heavy-duty industrial machinery, and agricultural machines.

With its long accumulation of experience and know-how in the auto-parts industry, as well as its close and long-term partnership with a big group of best-quality Taiwanese parts suppliers, Marutomo hopes on the one hand to ally with an increasing number of Taiwanese partners for the joint development of sales in the Latin America market, and on the other hand to continue providing the finest of services and reliable, reasonably-priced products to customers in the regional market. These efforts will help Marutomo to maintain its sustainable operation as a major AM parts supplier.
