

Genemax Industrial Inc.

Screws and barrels, die heads, gears, gearboxes, screw and barrel segments, co-rotating twin screw extruders

Founded in 1996, Genemax Industrial Inc. is a top-caliber Taiwanese supplier of precision parts and key components for extruders.

Genemax supplies a full line of extruder **machining** parts and components as below.

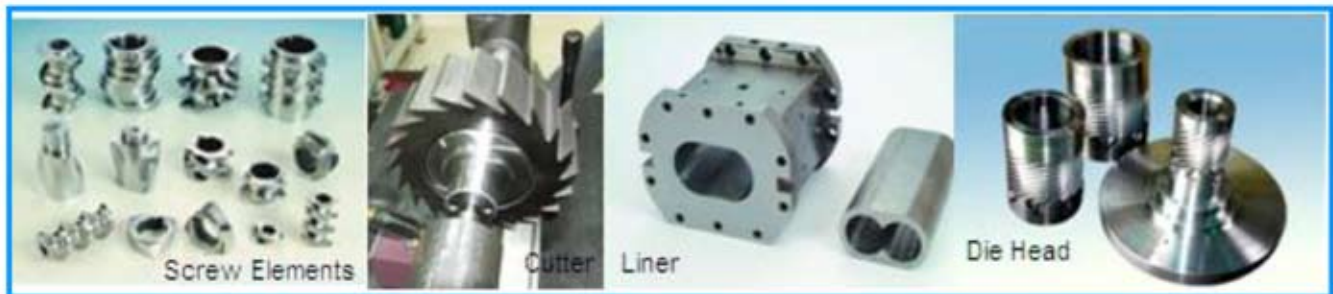

- 1) Screw and barrel. (Nitride and Bimetallic) (Single and Twin)
- 2) Twin screw (co-rotating, counter-rotating and conical Twin screw)
- 3) HIP Twin screw
- 4) Single gearbox for extruder
- 5) Twin gearbox for extruder ((co-rotating, counter-rotating and conical Twin screw extruder)
- 6) Die head: blown film dies, blown molding dies, pipe dies, strand dies and profile.
- 7) Roll: mirror rolls, rubber rolls, silicon rolls, sandblast rolls
- 8) Gear Pump
- 9) Screen changer, Static mixer, Rotary cutter, Die plate, Air ring
- 10) Down-stream unit

The company is not only providing precision machining but also good on steel, metallurgy, heat treatment and surface treatment.

The firm is particularly in providing high wear- resistance and corrosion-resistance steel including bimetallic, Hastelloy C276 and HIP PM-Steel.

Bolstered by consummate production techniques and a complete line of state-of-the-art production equipment, the company can supply high-precision screws and barrels from 15mm to 400mm in diameter and up to 8000mm in length, in either nitride-treated or bimetallic models, to fill a wide variety of applications.
