

Homer Hardware Inc.

Assorted stamped hardware including hinges, latches, pulls, knobs, towel holders, suction cup hooks, seatbelt buckles, and automotive parts

Homer Hardware Inc. is a specialist manufacturer of metallic parts, including hinges, latches, pulls, handles, knobs, towel holders, D-rings, suction cup hooks, seatbelts, seatbelt buckles, and many other stamped hardware items for furniture, bathroom, and automotive applications.

An experienced OEM and ODM supplier, Homer also welcomes custom orders and, backed by the most advanced production facilities including precision punch presses, CNC machinery, and 20~400-ton heavy-duty stamping presses, is able to efficiently develop tooling and manufacturing based on shop drawings.

Homer's strong capability in developing molds, operating the latest linear cutters and PC-based electric discharge machines (EDMs), and achieving precision mold positioning and production is another advantage in the generation of high-quality products that fully meet customer demands.

Exporting 95% of its output to customers around the world, mostly in Europe, the USA, and Japan, Homer generates some US\$330,000 in revenues monthly and up to US\$3.3 million annually.

The company is highly appreciative of its customers for their long-term support and patronage, and plans to further develop global markets by continuing to enhance its know-how and develop innovative products. Homer welcomes enquiries for more information at any time.
