

# Tzung Wei Plastic Machinery Co., Ltd.

PS/PE foam extrusion lines, sheet extrusion lines, recycling extrusion lines, foamed net manufacturing equipment, profile extrusion lines, strand pelletizers

Ever since its founding in 1990, Tzung Wei Plastic Machinery Co., Ltd. has specialized in developing and manufacturing plastic extrusion lines and equipment.

With a modern factory in Taiwan's southern metropolis of Tainan, the company supplies a wide spectrum of extrusion-related equipment, including PS/PE foam extrusion machines, PVC profile extruders, foamed sheet, tube, net and rod extrusion lines, recycling extrusion lines, film blowing machine lines, laminating lines, pipe extrusion lines, PET monofilament extrusion lines, pelletizers, strand pelletizers, tandem

machines.

and control to allow adjustment of density and thickness of sheets to achieve flat, smooth surface.

Its new tandem PE/PS foam sheet extrusion line proves Tzung Wei's strong technical skills and knowledge. The machine is built with a gear reducer with high torque and loading design that greatly enhance operational stability and quietness, with specially designed, treated extruder barrel and screw for consistent output and prolonged lifespan. Furthermore, the machine is easy to operate

foam sheet extrusion lines, horizontal forced die-face cutting type recycling pelletizers, auto vacuum loaders, mixers, vibrating, oil temperature control units, double-sided bearing support pelletizers etc.

For decades, the company has continuously researched and developed new technology to beef up machines with higher productivity, stability and quality to meet customers' ever-changing demand. The efforts have seen positive results, as the well-established manufacturer is increasingly highly regarded among downstream manufacturers from different sectors worldwide for top-tier
