

# Yu Jong Machinery Industries Co., Ltd.

**Circular knitting machines, plastic extruders, bag making machines, printing machines, turnkey plant**

**E**stablished in 1982, Yu Jong Machinery Industries Co., Ltd. specializes in making bag-making machines and related turnkey plant.

Following more than 30 years of development, Yu Jong has built a comprehensive product lineup, covering circular knitting machines, plastic extruders, packaging machines, fiber drawing machines, laminating machines, plastic bag making machines, automatic cutting, sewing and hot laminating machines, high-speed fully automatic bag sealing and sewing machines, flat yarn extrusion lines and roll-to-roll printing machines, as well as whole-plant equipment for cement sacks, PP and PE woven bags, large packaging sacks, etc.

The company emphasizes that all its machines are developed independently and based on seasoned know-how and practices to meet market trends toward low noise and high energy-efficiency, stability and performance.

Besides, this maker insists on adopting high-quality parts and components made in Taiwan, and top-caliber bearings from Japan's leading suppliers to achieve better durability and quality. Plus, all belts in its extrusion machines feature low wear friction and need little oil for lubrication, hence greatly enhancing quality of output.

Committed to engineering efficiency, continuous R&D, rigorous quality control, professional services and technical support and reasonable prices, the company is renowned among global buyers as a reliable supplier.
