

Fwu Yih Brass Enterprise Co., Ltd.

Brass connectors, ball valves, various copper parts

Fwu Yih Brass Enterprise Co., Ltd. was established in 1989 and specializes in developing and manufacturing copper products and parts for wide-ranging applications including plumbing fittings, faucets and shower equipment, sprinklers, agricultural machinery, air and electric tools, automobiles, and building materials.

The company initially focused on copper ball valves and copper ball cooks, and then drew on its accumulated know-how to diversify into related items and broaden its product lineup. Today the firm supplies a variety of not just copper ball valves and ball cooks but also simple E-type copper attachments; needle valves; fast brass connectors; PU, PE, and nylon tubes; trumpet brass connectors for

brass tubes; labor-saving quick joints; quick couplers; air pressure components; steel parts; sprayers; and brass connector-elbows with threads conforming to the U.S. NPT and NPTF standards.

Consistent high quality is the appeal of Fwu Yih's products. To assure their ongoing appeal, the company regularly upgrades its production lines by introducing advanced manufacturing equipment such as CNC machines, machining centers, and high-precision lathes into its modern ISO-9001-certified factory. This guarantees not only reliable quality but also high productivity and production efficiency, helping customers to shore up their businesses.

Committed to on-time delivery, timely services, and customer satisfaction, Fwu Yih has built up a high profile among professional buyers worldwide as a trustworthy supplier that capably fills OEM (original equipment manufacturing) orders to meet clients' growing demand for low-volume, high-variety production.
