

Yuan-Chang Hardware Enterprise Co.

Brake hose, high-pressure hose, stainless-steel hose, metal hose, PTFE hose, Teflon hose, pneumatic/hydraulic pipe fittings etc.

Founded in 1996, Yuan-Chang Hardware Enterprise Co. (known pre-2006 as Mao-Yi) is a veteran company specializing in developing and manufacturing high-quality hydraulic hoses. After changing the corporate name, the firm further diversified product lines into customized oil hoses for petrochemical and machinery applications, including construction machinery.

The firm offers quality products for wide-ranging applications, including brake hose, high-pressure hose, stainless-steel hose, metal hose, polytetrafluoroethylene (PTFE) hose, Teflon hose, pneumatic/hydraulic pipe fittings, pneumatic/hydraulic parts, quick-release coupling, stainless-steel coupling, brass coupling, aluminum coupling, among others.

With ample know-how and expertise, Yuan-Chang branched into production of metal brake hoses in 2004, supplying quality products to global manufacturers of automobile, motorbikes, and all terrain vehicles (ATVs).

Another milestone of the company was product quality and precision optimization, Yuan-Chang in 2007 introduced the top-end, most advanced, and biggest machine tool of its kind: FINN-POWER FP160VS hose-crimping swagger to make hose products.

With top-end machine tools, ample know-how, and high production efficiency achieved by superior corporate management, Yuan-Chang has been expanding global customer list by offering quality, precision and reasonably-priced items.
