

# Chen Yu Plastic Machine Co., Ltd.

Plastic extruders, PVC profile extrusion machines, soft & rigid plastic pipe making machines, plastic pelletizers and recycling equipment

Ever since 1991, Chen Yu Plastic Machine Co., Ltd. has been developing and manufacturing plastic extrusion machines and turnkey equipment for wide-ranging applications.

Chen Yu offers plastic-wood-composite profile extruding machines, plastic recycling equipment, PVC plastic pallet making machines, PVC profile extruding machines, PVC reinforced and soft hose making machines, PVC pipe making machines, PE pipe making machines, water-cooled PVC pelletizers, and auxiliary equipment for PVC profile extrusion lines.

Over 20 years of effort on R&D has enabled the company to build solid reputation among customers at home and abroad. In addition to its hot-selling PVC pelletizer series, which are widely used by customers of cables and wires, shoe soles, rigid and flexible tubing, and foam molding, the wood-PVC-composite profile extruder is another notable product, which turns out PVC profiles with realistic woodgrain and great resistance to fire, water and insects, with such profiles being 100% recyclable and further treated as natural timber.

With decades-long experience in developing braided hose making machines, the company will soon launch new models for industrial hoses, which will meet market trends for low noise, high productivity, performance, easy operation and maintenance.

The company's machines are sought-after in the Middle East, Africa and Central and South Americas as top-tiers against competing models from Italy, also being partly marketed under its "CY" brand.
