

Chuan Yao Machinery Co., Ltd.

Precision machinery components

Chuan Yao Machinery Co., Ltd., founded in 1980 in central Taiwan, is a specialist manufacturer of precision machinery components with high machining capacity. The company has installed a spate of state-of-the-art production equipment and inspection instruments to ensure versatility of its products.

The company's machining capacities include turning, milling, EDM and grinding. Major materials for its products are machining steel and stainless steel, aluminum and silicone alloys, all type of brass, bronze and copper, and non-ferrous metals.

In addition, the company's partner factories specialize in sheet-metal welding, heat treatment, surface treatment (blackening, blasting, chrome plating, nickel plating, anodizing), and lapping and grinding.

Chuan Yao's versatile production equipment includes CNC machining centers, conventional milling centers, conventional turning centers, cylinder grinders, and surface grinders.
