

Ynx Ching Enterprise Co., Ltd.

Mouse traps, clips, hose clamps, eyelets, galvanized steel items

Established in 1997, Ynx Ching Enterprise Co., Ltd. specializes in manufacturing hose clamps, mouse traps and other metal products with seasoned production capability.

The company began its operation by making galvanized steel, stainless steel and nylon hose clamps, and then ventured into high-pressure hose clamps, butterfly hose clamps, American-styled hose clamps, steel-wire hose clamps, stop-leak clamps, zebra type hose clamps and T-bolt clamps, as well as eyelets, mouse traps, mouse trap stations, etc., all of which are available in custom specifications.

This maker's competitive advantage mainly lies in its strong production capability, which is driven by well integrated in-house production line composed of R&D and tooling design to finishing treatment. This ensures not only cost efficiency, but also consistent quality and speedy delivery.

Besides, following years of hard work on continuous improvements of quality and production skills, the company capably handles OEM (original equipment manufacturing) and ODM (original design manufacturing) orders. It has exported products globally and built profile as a reliable, competent supplier with strong commitment to customer satisfaction.

Huang says that his company's "DYNAMIK" brand has built clear images of fast development speed, best quality, and top performance. In addition to increasing own-brand sales revenue, Dynamik's OEM/ODM business has been also increasing significantly in recent years.
