

Strong Well Inc. Corp.

Clutch discs, clutch plates, clutch assemblies, clutch cylinders, clutch facings etc.

Founded in 1979, Strong Well Inc. Corp. is a veteran company specializing in producing high-quality, durable clutch products, including clutch discs, clutch plates, clutch assemblies, clutch cylinders, clutch facings etc., for the international replacement aftermarket. It globally markets products under its own DAK brand, also shipping to customers under OEM basis.

With annual production capacity up to two million clutch plates, Strong Well claims to provide wide array of plates sized 160mm to 430mm, for almost all popular Japanese, American, Korean, European makes and models, as well as developing and supplying products for most agricultural machinery and forklifts.

Strong Well is very proud of its on-time delivery, high product quality, and reasonable-prices. In addition to numerous items in its catalog, the firm welcomes buyers to provide samples for joint tooling or product development. To provide the best customer services, further upgrade global competitiveness, and build worldwide reputation, it insists on steady focus on product and technical innovation, upgrading to achieve sustainable operation.

The firm attributes its success as clutch parts supplier to mainly focusing on clutch parts development and production, its full line of products for all makes and models, and industry-leading quality products.

Backed by its competitiveness, Strong Well has set up long-term and stable partnerships with customers in major market as Europe, the U.S., Southeast Asia, and the Middle East.
