

King Ming Industry Co., Ltd.

Dinning carts, shelving units and systems, and oven racks

Founded in 1975, King Ming Industry Co., Ltd. specializes in the manufacture of dining carts, hospital/clean room equipment, medical baskets and oven racks, and shelving units and systems for industrial, commercial, and residential use, as well as for use in warehouses, hospitals, schools and dining and beverage equipment. Besides, the company also provides customized products.

The company operates a 72,000-square-foot plant, located in Yunlin County, central Taiwan, which boasts convenient transportation and can be expanded to accommodate new products. Backed by decades-long experience in wire forming and tubing, the company is capable of independently handling the entire production process from wire drawing, cutting, and bending to welding, plating, varnishing, and packaging.

In recent years the company has introduced from abroad a spate of high-tech automated foreign machines that can shorten manufacturing time, save labor cost and turn out higher-precision products to meet customers' demand for higher-quality products.

This well-integrated production capability ensures consistent quality and has earned the company a solid reputation as one of the best suppliers in its line.

King Ming is also impressive for its innovativeness. Some of its products, widely used in supermarkets, department stores, warehouses, hospital kitchens, living rooms, etc., have been patented in the U.S., Japan, and other countries for their innovative design. The company is also certified by NSF in the U.S., providing further evidence of its status as a world-caliber manufacturer.
