

Tung Yu O.A. Co., Ltd.

»»» Office chair components

Tung Yu O.A. Co., Ltd., founded in 1986, is a leading manufacturer of office chair components in Taiwan, being known for products boasting multi-functionality.

The company's products, including synchronizing mechanism, self-weighting mechanism, tilt mechanism, seat slider, and back bar, feature ergonomic and safety-oriented designs.

Its SN89 synchronizing mechanism, for instance, allows the backrest to move at about a 2:1 ratio relative to the seat with its four locking positions, coupled with a return-prevention system for the backrest. Also, it is integrated with tilting function and seat slider, which enables adjustment of the depth of seat.

Its SA-9001 self-weighting mechanism, strengthened by an aluminum housing, enables a user's weight to automatically adjust to a comfortable sitting position and with recline tension without the need for manual tension adjustment. The mechanism comes with two levers, with one for height adjustment and the other for tilt adjustment. Also, it is outfitted with a four-position locking design and return-prevention system for the backrest.

SN-8960 Product Introduction

Front chassis, ergonomic design, double rod pressure and tilt angle lock switch, hand-adjusting spring, may vary depending on the individual's body weight and comfort make the appropriate adjustments, breaking the previous adjust the springs forward tightness.

Besides supplying such parts that are well suited for medium and large chairs, the company always welcomes partnerships with contract manufacturers, dealers, traders and retailers for R&D and production projects.

Tung Yu has built solid technical strength, upheld by precision manufacturing equipment, stringent quality inspection, scientific management, and well trained R&D specialists.

In addition to making thorough inspection of every single product before delivery, the maker places strong emphasis on research and development, quality, service and innovation, all of which help to develop products that are in tune with customers' tailored requirements.

With providing customers optimal products and services the corporate goal, the company has never stopped upgrading its manufacturing capability by introducing new designs and manufacturing facilities. (KL)
