

Jason Auto-Machinery Co., Ltd.

Combination jointers and planers, slider-rail assembly machines, brake cable & steel rope welding machines

Jason Auto-Machinery Co., Ltd. was founded in 1987 by its owner Mr. Jason, who was originally inspired to pursue a career in machining while in an internship course during his school years, where he was awestruck by a cutter on a lathe that shaped a rotating iron bar into a fluted workpiece or ball-tipped cylinder. Such deeply-etched impression sparked his curiosity ever since to, also due to industrial evolution in Taiwan, customer support and guidance by predecessors, motivate the entrepreneur to grow sustainably his dedicated automated machinery business over 20 years.

Just as seed capital is essential to any startup, Jason Auto-Machinery will forever be grateful to Changhua-based (southern Taiwan) Chia Cherne Industry Co. among other customers for placing the first order to start the fledgling enterprise on the way to its current success.

Business Philosophy

While having gained strength and know-how through developing and manufacturing countless automated machines, the company continues to adhere to the four core pillars of its business philosophy.

1. The mission is to always supply excellent, optimized machinery.
2. The goal of partnership is to provide consultancy and high-end service.
3. Jason's highest honor is achieving total customer satisfaction.
4. The maker values dealing with global customers as fateful opportunity to build mutually-profitable ventures.

Jason Auto-Machinery's product lineup mainly includes automatic two-sectional slide assembly machine, automatic tri-sectional ball-bearing track assembly machines, two-in-one brake cable/steel rope welding machines, etc.

Features of Jason Auto-Machinery's automatic tri-sectional ball-bearing track assembly machine (Model 46):

1. Number of steel balls used is easily adjustable.
2. Slides can be automatically lubricated with grease during assembly.
3. Machines can be custom designed, carry customer's logo, and developed/made according to sample and special specs.
