

Jiuh Sheng Tech Co., Ltd.

Bulbs and LED bulbs for automotive and motorcycle lights, LED modules

Ever since founded in 1978, Jiuh Sheng Tech Co., Ltd. has been specialized in developing and manufacturing various ordinary and LED bulbs for use in automobiles and motorcycles.

Upholding quality, the company carries out stringent QC measurements in compliance with international standards throughout production, and continuously improves product design and manufacturing processes. Accordingly, this maker has enjoyed brisk sales growth and a solid name as a trustworthy supplier of its kind among global buyers for the years.

To secure long-term development sustainability and mutual benefits with customers, the company has actively expanded its repertoire of R&D skills and manufacturing capabilities by drawing on its decades-long expertise in LED lighting, as well as through technical cooperation with experienced professionals. With the effort paying off, the veteran maker now capably develops and mass produces LED modules in house, not to mention supplying customized models for different purposes with great performance, fine quality and reasonable prices as required by customers.

Underpinned by its motto of "quality, enthusiasm, and technology," Jiuh Sheng Tech spares no efforts to hone its competitive edges through improved quality, manufacturing capabilities and R&D skills, in hopes of helping customers build successful businesses in their markets with its high-quality products and professional troubleshooting service.
