

Li Chen Industrial Co., Ltd.

Professional manufacturer of belt conveyors, roller conveyors, pallets for production lines, mold & bar storage racks and automatic packaging systems

Ever since founded in 1983, Li Chen Industrial Co., Ltd. has specialized in developing and manufacturing various conveyors and automated material handling equipment and systems as a professional supplier.

The firm's product lineup comprehends steel frame conveyors, roller conveyors, metal detector conveyors, hopper conveyors, automatic packaging systems, low-profile strapping and wrapping systems, aluminum extrusion conveyors, inkjet coding and marking conveyors, bar and mold storage racks, pallet assembly machines, automated conveyor systems equipped with robotic arms, etc., as well as safety fences, conveyor parts and other products for manufacturing activities.

Li Chen's automated material handling equipment and systems have been widely applied in metalworking, plastic injection molding, packaging, logistics, recycling and reproducing, pallet packaging, wrapping and strapping, electronic and food manufacturing, vertical conveying, electroplating and painting, bulk goods metal detection, and so forth, as ideal whole-plant and automation solutions.

In addition to ODM (original design manufacturing), this maker also provides customization services to meet special requirements, with an aim to help customers achieve better material and inventory management, greater operational efficiency and higher added-value.

Among the company's hot-sellers, belt conveyor series are built with durable frames made of stainless steel or steel plates and driven by precision gears, and hence feature high resistance to high temperature and corrosion, greatly improved reliability and belt slippage, and smooth operation, with carrying capacity of around 200kg.

Also sought-after by customers craving for space-saving mold handling systems is its industrial roll-out shelving mold storage rack, in which stored molds can be accessed easily with cranes and hoists, rather than forklifts, to maximize the use of existing floorage. The rack series can withstand a maximum load of up to 3,000kg.

Underpinned by its motto of "Professionalism, Innovation, Integrity and Responsibility," Li Chen has been well-recognized by customers at home and abroad.
