

Kae Dih Enterprise Co., Ltd.

Electric random orbital sanders, professional vacuum cleaners, centralized vacuum cleaner systems, industrial vacuum cleaners

.....

Founded in 1983, Kae Dih Enterprise Co., Ltd. is an ISO 9001-certified developer and manufacturer of wet/dry vacuum cleaners, industrial vacuum cleaners, dedicated vacuum cleaners and electric random orbital sanders.

After gaining solid foothold in the global vacuum-cleaner market, KaeDih tapped its strong R&D capability to successfully diversify its extensive catalog into high-end electric sander business, with the sanders marketed under its own "JESON" brand.

Kae Dih's central-vacuum electric random orbital sander is a high-profile product and its 5.0mm orbital action and 125 mm backing pad combine to make it a unique, versatile machine packed with features.

This compact, lightweight sander is built with a super-quiet, 220V-240V brushless, 7-speed DC motor that is powerful enough to maintain constant speed under load. The optimized ergonomics of the sander enables comfortable grip and ease of use, while the low center of gravity achieves labor saving and stability. Also adding extra value to the product are easy maintenance, high efficiency and the smooth central vacuum shroud.
