

Shyang Yih Hardware Factory

»»» Drinking faucets, kitchen & drinking faucets, tubing fittings, ball valves

Since its establishment in 1990, Shyang Yih Hardware Factory has been devoted to production of faucets and parts as one of the specialized makers in the line that many clustered in Taiwan's central county of Changhua.

The company supplies a wide range of drinking fountain faucets, bathroom faucets, kitchen faucets, RO faucets, bronze safety valves and water gauge valves, brass needle valves and ball valves, brass nylon hose fittings, water inlet T-joints etc., all of which are available in customized specifications.

Being conscientious of end-user's health, the company spares no effort to apply non-hazardous materials and manufacturing methodologies in production. It has already developed different types of drinking and kitchen & drinking faucets meeting NSF (National Sanitation Foundation) requirements for lead contents. One additional feature of the NSF-certified faucets is the full integration of hot, cold and RO water lines into a single outlet without contaminations.

Committed to quality, on-time delivery and personalized service, the company, ISO9001:2000 certified in 2002, has a solid name as a trustworthy faucet supplier in overseas markets, with strong capability to fill OEM orders.
