

Grindix Industrial Corp.

Universal cylindrical grinders, hydraulic crankshaft grinders, rubber and plastic deburring machines

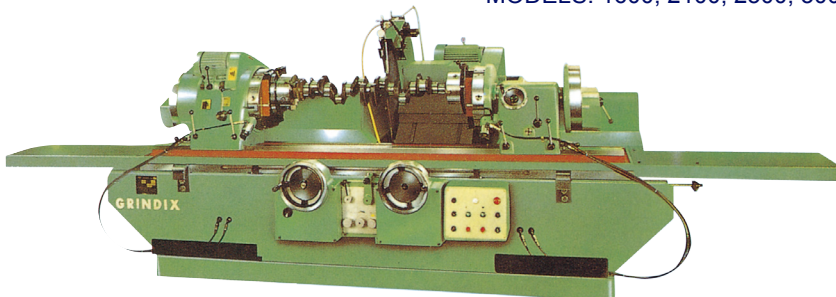

The Grindix Industrial Corp., established in 1981, is one of Taiwan's top manufacturers of precision grinding machines with a strong reputation as a professional producer of specially designed grinding machines.

The company's major product line currently includes universal cylindrical grinders, hydraulic crankshaft grinders, hydraulic universal cylindrical grinders, automatic binding machines, and press and automatic material feeding trestles. Rubber and plastic deburring machines are also available to meet the special needs of customers.

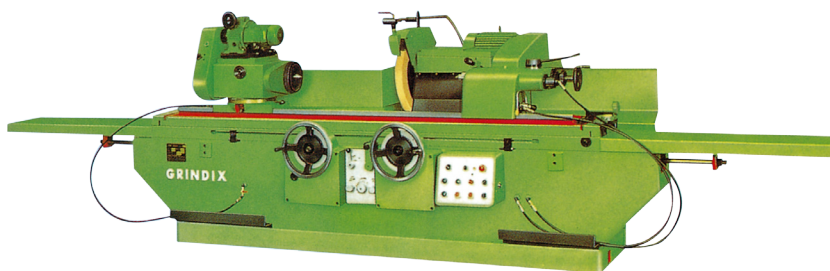

Grindix's universal cylindrical grinders feature a heavy bed, eight-speed workhead with all-belt drive for full power at all speeds, and a wheel spindle that is induction-hardened and precision-ground. Standard attachments for the machine include a swivel base motor-driven workhead, lever-operated tailstock, standard grinding wheel, wheel dresser holder, coolant supply unit, lubricant supply unit, table swivel indicator, splashguard, and permanent magnetic chuck and plate.

The company operates a 7,200 sq. ft. factory with a monthly production capacity of 15 light- and heavy-duty grinders, which are popular in major markets worldwide. With an in-house research and development team, Grindix is able to provide its customers with a full range of technical support and design services.
