

Cheng Hai Oilless Metal Industrial Co., Ltd.

Powder-metallurgical parts for locks, power/hand tools, vehicles, machinery, etc.

Founded in 1987 in Tofen Township, Miaoli County, northern Taiwan, Cheng Hai Oilless Metal Industrial Co. has developed into one of Taiwan's leading suppliers of powder-metallurgical parts. The company is going all-out to forge long-term business relationships with its customers through product development and enhancement, and has succeeded in exporting its high-quality products to global markets including Japan, the United States, Ireland, Germany, India, Pakistan, and Hong Kong.

Cheng Hai has expanded at a stable and methodical pace ever since its birth. From 1991 to 2009 it set up a subsidiary in Thailand and another in China, achieved BSMI ISO9001 and TS16949 certification, and constantly installed advanced machinery. Today, its well-equipped facilities include 5~200-ton compacting machines, 15~40-ton sizing machines, sintering machines, steam-treating machines, and a variety of innovative testing instruments, enabling it to offer a wide variety of precise and non-standardized made-to-order items.

The main product line currently encompasses gears, oil-impregnated bearings, and parts/components for locks, power/hand tools, vehicular equipment, oil pumps, quick-release joints, and sewing machines, among others.

Cheng Hai's chairman and GM, C.T. He, explains his philosophy of business: "Powder metallurgy requires large investments and specialized techniques. We've gone all-out to master this field, from purchasing the latest facilities to introducing a stringent quality-inspection system and instilling top-notch skills in our workers, all with the aim of perfecting our products. Our experience, staff, and reliability are the keys to our being an unparalleled partner for buyers around the globe."
