

Tzy King Enterprise Co., Ltd.

Auto mirrors

The Tzy King Enterprise Corp. has specialized in making and marketing a variety of auto mirrors at home and overseas ever since its establishment in 1976.

More than three decades of devotion to this business have seen the company evolve into a time-tested auto mirror manufacturer, and have endowed it with a solid reputation in the emerging countries of the Middle East, Africa, and Latin America. Its products, some of which are marketed under its own "KingMirror" brand, have become much sought-after for aftermarket use.

One of the main attractions the company's auto mirrors is consistent quality, which is attributed partly to its sophisticated manufacturing capability and partly to the continuous improvement of the quality control measures conducted at the factory. The company has been approved by the ISO 9001 system, and all of its products measure up to CE standards.

Tzy King is also notable for the constant enhancement of its manufacturing efficiency, which enables it to turn out products at the lowest possible cost. These budget-priced products make it easier for the company's foreign agents to win markets.

The company is strongly committed to customer satisfaction, guarantying its clients quick service and on-time delivery, always standing ready to help them with problem-solving based on its seasoned know-how.
