

Long Shing Iron Works

Welding and assembly of woodworking machine frames and mechanical devices

The Long Shing Iron Works is a specialist in welding and assembling woodworking machine frames (including double- & quadruple-face models), welder parts, and various mechanical devices.

With years of experience in welding tool magazines for CNC machining centers, cutter sharpener frames, tube bender bases, vulcanizing barrels, plastic-extruder frames, blow-molder frames, hydraulic formers, and shoemaking pressure containers, the company also handles furnace inspection, maintenance and piping work.

A subcontractor with specialized expertise, Long Shing has built a solid reputation in the welding industry.
