## Conventional and CNC/NC EDM machines including wire-cut and drilling units

Giann Sheng Machinery & Electric Industrial Co., Ltd., in business since 1982, is a Taiwan-based EDM (electrical discharge machining) machine manufacturer globally recognized for expertise, exporting globally with plans to further expand markets worldwide.

Under its own "JSEDM" brand, Giann Sheng offers the broadest range of EDM machines among local peers, including both conventional and CNC/NC models such as wire-cut and drilling units. It is also the first in Taiwan to apply DC servo control in EDM machines and to complete AC power supplies.

Giann Sheng's EDM machines are designed for high-precision mold machining for aeronautical technology, IC electronics and high-tech healthcare equipment applications. They feature user-friendly interface, outstanding control system, PCD-specific (polycrystalline diamond) micro-wire electric circuit, high-rigidity spindle, high-accuracy linear guide-way, automatic wire-threading system etc.

Its product line currently contains the NCF Series for programmable NC EDM with Z-axis; EB-N Series for programmable NC EDM with Z-axis and color monitor; fully CNC controlled CNC-L Series with 17 orbit-cutting movements; simple CNC-E Series with multi-cavity and side sparking function; WEDM Series for fully CNC wire-cut EDM with five-axis motor control; and collections for drilling EDM with digital display.

CE, ISO-9001 and ISO-9002 certified as well as a winner of "It's Very Well Made in Taiwan" award, the maker adopts computerized MIS (Management Information System) to enhance efficiency of all processes. Its efficient, well-organized management team also plays a crucial part in provision of quality, customer-oriented products and service.

Giann Sheng welcomes enquiries for its newly developed products and other details.

y for global buyers.
