

Forng Wey Machinery Co., Ltd.

»»» Straightening machine, drill pointing machine, wire straightening machine

Forng Wey Machinery Co., Ltd. specializes in manufacturing wire straightening and cutting machines and grinding chamfer machines.

The maker supplies different series of straightedge rolling machines and wire straightening and cutting machines. The series models are suitable for straight-cutting processed products of non-metals and iron wires, such as welding rods, kitchen utensils, fan-frames of umbrellas, metal cages, compact disk racks, hangers, luggage frames, and many other wire products.

It also produces many grinding chamfer machines, which are used for weaving needles, curtain hooks, pins, flying spear needles, glasses supporters, and various metal thread as well as chamfer angle processing.

The company has fared smoothly in exporting its products to Southeast Asia, India, the Middle East, and Western Europe. The company accepts orders on the OEM/ODM (original equipment/design manufacturer) basis.
