

Newbud Industrial Corp.

Misting systems, trigger nozzles, fittings, connectors, spray wands, sprinklers, gardening tools

Founded in 1986 in Changhua County, central Taiwan, Newbud Industrial Corp. is a specialized supplier of gardening products and accessories.

Newbud is unquestionably a globally recognized supplier in the field of gardening, given that its products are widely accepted by specialized buyers all around the world, including such big-name retailers as Melnor of the U.S., Rehau of Germany, Argos of the U.K. and Coop of Italy. The achievement is attributable to its strong R&D capability that has been honed by its parent company, Hsiu Fu Bronze Corp., a veteran maker of brass connectors in Taiwan with over 25 years of manufacturing experience.

Newbud's latest product, Garden Hose Misting Tower, is an example of its excellent R&D prowess. With a misting bar of high-quality metal that has attached five nozzles, the misting tower can be connected to a standard garden hose for convenient water supply and easy misting, and is height-adjustable from 90mm to 200mm for wide-ranging applications.

Thanks to improved mechanical design of the nozzles, the mist or water vapor from the misting tower are tiny, even enough to be suspended temporarily to keep the surrounding cool and refresh users soaking up the sun. The tower also helps to repel insects, ideal for use not just on patios and gardens, but during sunbathing, barbecues and outdoor activities, not to mention being a convenient tool to economically irrigate plants.

The firm's Professional Outdoor Misting System with 3/8-inch extension set is also a notable product, which is proven effective to lower outdoor temperature by up to 12 degrees Celsius and consumes only 2 liters of water per hour per nozzle, being suitable for decks, porches, patios, gazebos, gardens and greenhouses.

In addition to various gardening accessories as brass nozzles, brass connectors, spray guns, water wands, sprinklers, hoses and adaptors, the company also works on development of gardening tools, including shears, pruners, rakes, saws, shovels and related hand tools. Featuring unbeatable quality and innovative functions, the company's independently developed gardening products are popular among end-users.

The firm also welcomes orders on an OEM (original equipment manufacturing) and ODM (original design manufacturing) basis. (SC)
